

INTERNATIONAL DERMATOLOGY OUTCOME MEASURES

REQUEST FOR APPLICATION - HS GRANT

PURPOSE

IDEOM is seeking grant applications that encourage research into the disease hidradenitis suppurativa (HS). The goal is to stimulate the development of new research programs in the field of HS capable of competing for long-term funding from the National Institutes of Health or other agencies in the future.

NUMBER OF AWARDS

2 grants will be awarded in 2021. Awards are contingent upon the availability of funds and the receipt of sufficiently meritorious applications.

BUDGET

Applicants may request up to \$50,000 (direct costs only) per year.

ELIGIBILITY

The principal investigator must be personally and actively be responsible for the conduct of the proposed research, and eligible to apply for research grants under the guidelines of the applicant's host institution. IDEOM does not fund projects that are part of the NIH intramural research program or awards to private foundations without an academic affiliation to dermatology.

APPLICATION INSTRUCTIONS

Grant applications must be submitted by email to amanda@dermoutcomes.org as a single pdf. The application should follow the format outlined below.

IMPORTANT DATES:

APRIL 1, 2021 - Letter of Intent

Please submit a 1-page letter of intent indicating primary subject of the proposal, principal investigator, and academic institution by APRIL 1, 2021. The letter of intent is used for reviewer selection.

AUGUST 1, 2021 - Application Deadline

OCTOBER 22, 2021 - Award Notifications

Awards will be announced at the Annual Meeting.

JANUARY 1 – DECEMBER 31, 2022 - Project Period

The project period for this Request for Proposals is one year, from January 1, 2022 – December 31, 2022. All funds are to be spent within this period.

REVIEW CRITERIA

Reviewers will be asked to base their evaluations on the criteria listed below.

- Alignment with IDEOM Mission, specifically plan to engage with IDEOM longitudinally
- Relevance to disease measurement (clinical and research) in hidradenitis suppurativa
- Outcomes in hidradenitis suppurativa, including patient reported outcomes
- Novel activity measurement including digital health, biomarkers, and other innovative approaches
- Likelihood of leading to additional funding
- Strategy, methodology and analyses are well-reasoned and appropriate to accomplish the aims
- Potential problems, alternative strategies, and benchmarks for success are presented

REPORTING REQUIREMENTS

Within 60 days of completing the approved project, the grantee is required to submit a written report summarizing their research experience and findings.

- The grantee must also present the work at an approved national or international meeting to be held within two years of funding
- 6 month updates to the IDEOM Board on the project
- Poster and/or brief presentation of progress and results at the IDEOM annual meeting

If an approved project cannot be completed as originally proposed or within the time limits mandated the grantee must immediately contact IDEOM.

All publications and presentations resulting from these grant funds need to acknowledge IDEOM support. Any outcome measures generated using this funding must be open access.

FORMATTING REQUIREMENTS:

The application should follow the following format, with a minimum of 0.5 inch margins and minimum of 11-point font size, single spaced.

A. TITLE PAGE: Include the grant title, principal investigator’s name, and affiliations.

B. ABSTRACT: Summarize the proposed research for a scientific audience. Abstract must not exceed 350 words.

C. LAYMAN'S STATEMENT: Summarize the proposed research for a non-scientific audience. This statement should describe the research question, the aims of the project, and the project's significance with respect to HS. Layman's statement must not exceed 200 words.

D. BUDGET: Each grant is limited to \$50,000 for one year. Indirect costs are not allowed. Provide a budget summary, including a concise statement of how you propose to allocate funds (amount and for what purpose). List all personnel to be included in the project and their anticipated support. Travel and publication costs are not allowed.

E. BIOGRAPHICAL SKETCH(ES): Use the NIH format to provide a biographical sketch of the proposal's principal investigator and any co-investigators who will play a significant role on the project. Each biographical sketch must not exceed five (5) pages.

F. LETTER(S) OF SUPPORT: Applicants may use this space to provide letters of support from collaborators or supporting people/facilities/resources who will contribute to the proposed research. If the applicant is a postdoctoral fellow, a letter of support from the applicant's immediate supervisor must be provided.

G. RESEARCH PROPOSAL: Research proposals must include the following four sections, maximum four (4) pages:

1. Specific aims: The goals of this one-year proposal should be succinctly stated. What hypothesis is to be tested? What do you intend to accomplish? Because this funding is intended to initiate projects that would qualify for additional future funding, please differentiate between the immediate aims of this project and related aims that would follow in year two or three.

2. Background and significance: Why is the research important? Evaluate existing knowledge in the field and specifically identify the possible contributions that your investigation may make.

3. Preliminary data/studies: Describe published or unpublished data that support your hypothesis, specific aims and/or experimental design.

4. Experiment design: Describe the experimental design, the procedures to be used, and the data analysis plan. Descriptions of established lab procedures are not necessary.

5. Plan to engage IDEOM longitudinally: Describe the plan to engage IDEOM continually following the funding period.

H. REFERENCES: List of references cited.

I. HUMAN SUBJECT PROTECTION: Describe samples, risks, adequacy of protection against risks, and potential benefit. Applications related to research on human subjects must be approved by the institutional review board prior to the initiation of successful awards.

J. ANIMAL STUDIES: Applications that involve research on animals must demonstrate their relevance to clinical dermatology. Application involving animal studies must be approved by an appropriate institutional committee prior to the initiation of successful awards.
